

Dear Senator Gerratana, Representative Johnson & members of the Public Health Committee:

My name is Mary Green, a GE employee and yoga teacher from Stamford, CT. **I am writing in enthusiastic support of Raised Bill 5327: An Act Concerning Health Freedom and the Practice of Classical Homeopathy.**

Homeopathy is a safe and affordable form of health care. I can personally speak to its value and efficacy. I have seen a practitioner for the past four years, with miraculous results. I travel regularly to India, and my Homeopath provides me with customized supplements to keep me well. Under her care, I have NEVER gotten so much as a stomach ache in India (the miracle!), while my colleagues regularly succumb to Delhi belly and upper respiratory distress. I would wish for more people to have access to this form of care, and with many choices of well-trained practitioners.

I believe that enabling nationally board certified classical homeopaths (CCHs) to offer their services in CT would result in more choice and lower costs for all who wish to take advantage of this effective modality. The CCH is the highest level of achievement for a professional homeopathy and the credential is recognized worldwide. More choice would bring the costs down for CT health care consumers, and the efficacy of homeopathy as preventative medicine should significantly lower health care costs for employers, insurers and the state of Connecticut alike.

I encourage all Committee Members to join me in supporting this bill. Thank you for your consideration.

Many thanks!

Mary Green
